PROFESSIONAL SUMMARY

Third-year Bachelor of Information Technology student at Otago Polytechnic Auckland, specialising in AI and cloud-native full-stack development. Independently built and launched **FieldFlow** — a live B2B SaaS platform for NZ trades businesses — running on AWS (Elastic Beanstalk, RDS, S3, CloudFront) with Xero OAuth2 accounting, Stripe subscription billing, OpenAI + Pinecone RAG, real-time WebSocket dispatch, and PWA support. Also deployed a production AI car dealership platform with TensorFlow CNN and Random Forest ML models on AWS. AWS Academy Cloud Foundations certified. Two years of professional work experience alongside full-time studies. Seeking internship or graduate opportunities in software engineering, cloud, and AI development.

EDUCATION

Bachelor of Information Technology

2023 – Present

Otago Polytechnic Auckland · Auckland, NZ

- ▶ Specialising in artificial intelligence, machine learning, and full-stack software engineering
- ▶ Consistently applying academic learning to real production deployments throughout the degree

WORK EXPERIENCE

Full Stack Developer & Cloud Engineer

Jan 2026 – April 2026

Surender Kala & Sons Pvt. Ltd. · Remote · Freelance

- ▶ Designed and deployed full-stack business website for Bhavishya® Kachi Ghani Mustard Oil, India
- ▶ Built complete CI/CD pipeline: GitHub Actions → Docker → Azure Container Registry → Azure App Service
- ▶ Developed JWT-secured admin dashboard with real-time WebSocket messaging, order management, and product catalogue
- ▶ Integrated OpenAI-powered AI chat assistant with a RAG knowledge base for product and business queries
- ▶ Stack: React, Spring Boot, PostgreSQL, Azure App Service, Docker, GitHub Actions

Customer Service Representative

Jun 2024 – Present

Z Energy · Auckland, NZ · Part-time

- ▶ Delivering high-quality customer service in a fast-paced retail environment
- ▶ Handling cash management, transactions, and end-of-day reconciliation
- ▶ Balancing full-time university studies with consistent part-time employment for 2+ years

PROJECTS

FieldFlow — Field Service Management SaaS

2025 – 2026

fieldflow.shubhamkataria.com

- ▶ Independently built and launched a live B2B SaaS platform for NZ trades businesses (plumbers, electricians, HVAC)
- ▶ Real-time dispatch board with drag-and-drop scheduling; dedicated technician portal; customer live-tracking via unique link
- ▶ Xero OAuth2 integration with token rotation — auto-syncs invoices and contacts with the accounting platform
- ▶ Stripe subscription billing across Starter / Pro / Business tiers with webhook-enforced access control
- ▶ OpenAI GPT-4o-mini + Pinecone RAG for AI job insights; Brevo SMTP for automated job-status emails
- ▶ Generates GST-inclusive branded PDF invoices and quotes via OpenPDF; installable as a PWA
- ▶ Frontend on AWS S3 + CloudFront, backend on Elastic Beanstalk (EC2), database on RDS PostgreSQL
- ▶ Fully automated GitHub Actions CI/CD — frontend to S3 with CloudFront cache invalidation, backend JAR to Elastic Beanstalk
- ▶ Stack: React 19, Spring Boot 3.1.5, AWS (EC2, RDS, S3, CloudFront, IAM, ACM, CloudWatch), Xero OAuth2, Stripe, OpenAI, Pinecone, WebSocket (STOMP), OpenPDF, PWA, GitHub Actions

AI Car Dealership Platform — AWS Production Deployment

2025 – 2026

dealership.shubhamkataria.com

- ▶ Architected and deployed full production infrastructure on AWS: RDS PostgreSQL, Spring Boot backend on Elastic Beanstalk (EC2), React frontend on S3, with two CloudFront distributions providing HTTPS for frontend and backend
- ▶ Configured custom SSL via AWS Certificate Manager (ACM) and DNS validation for custom domain
- ▶ Set up IAM roles and security groups to manage service permissions and database firewall rules
- ▶ Built fully automated CI/CD: GitHub Actions deploys frontend to S3 with CloudFront cache invalidation, and backend JAR to Elastic Beanstalk, on every git push
- ▶ TensorFlow CNN car brand recogniser (10 brands, 150×150px) and Random Forest trade-in valuator — 93% accuracy on 92,661 NZ records, deployed as Flask APIs on Hugging Face Spaces and Render
- ▶ RAG-based OpenAI GPT-4o-mini chatbot, WebSocket real-time buyer–seller messaging, JWT-secured multi-role admin panel (Customer / Sales / Admin / Super Admin)
- ▶ Stack: React 19, Spring Boot 3.1.5, AWS (EC2, RDS, S3, CloudFront, IAM, ACM, CloudWatch), TensorFlow, scikit-learn, OpenAI, Pinecone, Python Flask, WebSocket, GitHub Actions

Preloved Product Marketplace

2024

Firebase / React

- ▶ React-based e-commerce platform for pre-owned goods with real-time Firebase sync and guest browsing support
- ▶ Stack: React, Node.js, Firebase

TECHNICAL SKILLS

Languages	Python, Java, JavaScript, C#, SQL, R
Frontend	React 19, Vite, React Router, HTML & CSS, WebSocket (SockJS / STOMP), PWA, Responsive Design
Backend	Spring Boot 3, Spring Security, Spring WebFlux, Node.js, REST API, JWT Auth
Databases	PostgreSQL (AWS RDS), MySQL, Firebase
AWS Cloud	EC2, Elastic Beanstalk, RDS, S3, CloudFront, IAM, ACM (SSL), CloudWatch, VPC & Security Groups
Azure & DevOps	Azure App Service, Azure Container Registry, Docker, GitHub Actions CI/CD, Render, Git LFS

AI & ML	TensorFlow / Keras, scikit-learn, OpenAI GPT-4o-mini, Pinecone (RAG), CNN, Random Forest, NLP, Flask, Pandas, NumPy
Integrations	Xero OAuth2 API, Stripe Payments, Brevo SMTP, OpenPDF, Hugging Face Spaces
Tools	Git, GitHub, Git LFS, Postman, VS Code, IntelliJ IDEA

CERTIFICATIONS & ACHIEVEMENTS

AWS Academy Graduate — Cloud Foundations

December 2025

Amazon Web Services

- ▶ Completed AWS Academy Cloud Foundations — covers AWS Architecture, Core Services, Pricing and Support
- ▶ Badge: credly.com/badges/138dcb38-25b3-41b9-9942-fefa6396c47a

Machine Learning A-Z™: Python & R In Data Science

2025

Udemy

- ▶ Comprehensive ML course — regression, classification, clustering, deep learning, and NLP

FieldFlow — Independent B2B SaaS Launch

2026

Self-Initiated Project

- ▶ Independently built and launched a live production SaaS platform serving NZ trades businesses — AWS-hosted, Xero + Stripe integrated, PWA-enabled

Production AWS Infrastructure Deployment

2025

Personal Project

- ▶ Independently designed and deployed full production AWS architecture — EC2, RDS, S3, CloudFront, IAM, ACM, GitHub Actions CI/CD
